

Reduce travel disruption. Drive sustainable choices.

Lumo seamlessly integrates with SAP Concur to deliver timely disruption and sustainability information before, during, and after a trip, to drive better choices and enable smoother travel.

Disruption solutions

For travelers, travel managers, admin assistants, & event managers

Lumo's AI models continuously scan 20+ data feeds including the weather, air traffic control, flight status, and airport conditions, **helping choose better flights and proactively manage disruptions.**

- Browser extension shows delay and connection risk at the **point of sale**, helping choose disruption-minimizing trips.
- Flight **monitoring** sends alerts of potential disruptions, suggesting alternatives, and helping stay a step ahead of disruptions.
- Reports **measure** the impact of travel on **wellness** and burnout, and scorecard airline performance.

Benefits

- > Avoid 10-20% of disruptions
- > Boost traveler productivity
- > Reduce travel stress and burnout

Sustainability solutions

For travelers, travel managers, and sustainability managers

Lumo delivers actionable data to travelers based on our proprietary emissions calculations, and engages travelers by **providing data and incentives to choose better flights.**

- Browser extension shows emissions estimates at the **point of sale**, helping choose more efficient flights.
- Post-booking emails provide feedback to travelers on their choices, and **educate** travelers on drivers of metrics.
- Reports **quantify** aggregate emissions impacts across the organization, which can be **offset** through Lumo partners.

Benefits

- > Reduce emissions by up to 20%
- > Built traveler engagement
- > Meet sustainability targets

Deployment is easy through the SAP Concur App center with the click of a button. Get in touch with us at sales@thinklumo.com for help getting set up.
